

# Spring Laboratories

## PRODUCT CATALOG

# Innovative solution in the clutter of nutritional supplements

## Innovating in the nutraceuticals segment.

Capsules and tablets are bitter and 60% of them are non-therapeutic junk (excipients). Most of their active ingredients are denatured when they go through stomach acids and the hepatic portal system. Intravenous is painful, costlier and needs a specialist. While gummies are helpful, they have sugar and are sticky.

- Focus on Vitamins, Healthcare and Dietary Supplements
- Nutra Capabilities
- Flavor Profile
- Novel Drug delivery Technologies
- Sensitive Ingredients
- Well-researched and science backed actives
- Strong R&D team
- Manufacturing Capabilities

- State-of-the-art manufacturing facilities
- Better Applicability
- Innovative technology & processes

With Sporing Laboratories, we aim to be a technology partner to healthcare brands providing quality solutions backed by innovative technology and processes.

Visit [www.sporinglaboratories.com/](http://www.sporinglaboratories.com/) today to know more

Bringing you our nutraceuticals and healthcare supplements catalog under the Sporing Laboratories Brand. Our growing portfolio of leading products and developing technologies is bringing more innovations to life for the nutraceuticals and healthcare supplements segment.

We are an intellectual property driven company constantly developing various methods and formulations that have novel and unique applications directly targeting the disadvantages and shortcomings of existing dosage forms.

For nutraceuticals, Novel drug delivery technologies such as Oral Thin Film (OTF) are being developed on Orodispersible film technologies. Many of our OTF products of the nutraceutical business have also been sourced by leading Online/ E-commerce Healthcare Brands for distribution through their E-commerce and Online channels resulting in stellar growth for the business segment.

We're your partners from day one. From market analysis, product development, to support for regulatory compliance and packaging development, we do it all for you. You can incorporate your own nutrient package or choose from one of our large buckets of

[www.sporinglaboratories.com](http://www.sporinglaboratories.com)

standardised formulas. Vitamins, minerals or herbals, we are willing to try everything to come up with the perfect product for you.

With growing awareness of health and wellness, consumers are observant of what they consume. We source all natural ingredients with 100% traceability and proper provenance. Prospected across the world, we use clinically validated and standardised ingredients with complete transparency. We highly value the trust that your brand should develop with your customers.

Sustainability is one of our core values. We use 100% recyclable packaging materials and constantly find more ways to reduce our carbon footprint. While our format already uses the least amount of excipients translating to less effluents, we take the same care in packaging which is futuristic in style and soul.

Have a unique formulation for a specific health concern? Want to use a new ingredient? This is the place where we make it happen! We deliver results that are quicker than the rest, and cost effective.

We have developed and standardized carefully selected, sustainably sourced ingredients ranging from minerals to herbal extracts, and vitamins to proprietary blends. With our aim to make wellbeing an achievable reality, we are always on the lookout for more innovative ingredients.
